ACCLIMATING KOI & OTHER POND FISH

NOTE

The water in your pond or tub should be aged either by letting it sit for 1 -2 days or by adding artificial aging products such as **STRESS COAT** or **CHLORIMINE BUSTER** with **POND ZYME** and **MICROBE-LIFT**.

IMPORTANT KOI MAY JUMP THE FIRST FEW DAYS. PLEASE BE AWARE IF THEY JUMP OUT OF THE POND PUT THEM BACK IN IMMEDIATELY WITH STRESS COAT ON YOUR HANDS. WHENEVER POSSIBLE COVER YOUR POND WITH NETTING DURING THEIR ACCLIMATION PROCESS.

POND SALT must be added to support a healthy immune system.

- 1.> **Float fish-bag in your pond or deck tub for approximately 10 - 15 minutes.**
- 2.> **Carefully open the bag and pour out about 1/3 of the water. Replace the water with an equal amount of pond water. Float the fish-bag for another 10 - 15 minutes then repeat this process once more & float for a final 10 -15 minutes.**
- 3.> **Finally, apply a small amount of STRESS COAT to your hands and very carefully move the fish (by hand) into its new home.**

Your fish is guaranteed for 24 hours after purchase for replacement only and must be returned with the receipt along with an 8 ounce sample of your pond water.

Sorry NO cash refunds.
